

Centering the map on the new annotation

MapViewController.m

```
- (void) viewDidLoad
{
    ...

    CLLocationCoordinate2D annoCoordinate =
        CLLocationCoordinate2DMake(28.544192, -81.373286);

    MyAnnotation *annotation = [[MyAnnotation alloc] init];
    annotation.coordinate = annoCoordinate;

    [self.mapView addAnnotation:annotation];

    [self.mapView setCenterCoordinate:annotation.coordinate
                        animated:YES];
}
```

NOTE: this might conflict with setting the user location as the center
