

SETTING UP THE UITEXTFIELDDELEGATE PROTOCOL

CityViewController.h

```
@interface CityViewController : UIViewController <UITextFieldDelegate>
```

Declaring a Protocol

CityViewController.m

```
- (void)viewDidLoad {  
    self.notesField = [[UITextField alloc] init];  
    self.notesField.frame = CGRectMake(15, 220, 290, 30);  
    self.notesField.delegate = self;  
}
```

"self" here is CityViewController
