

ADD A UIButton TO SWITCH TO EDITNOTEVIEWCONTROLLER

CityViewController.m

```
- (void)viewDidLoad {
    UIButton *editButton = [UIButton buttonWithType:UIButtonTypeRoundedRect];
    editButton.frame = CGRectMake(20,220,280,50);
    [editButton setTitle:@"Edit Note" forState:UIControlStateNormal];
    [self.view addSubview:editButton];
    [editButton addTarget:self
                    action:@selector(editPressed)
                    forControlEvents:UIControlEventTouchUpInside];
}

- (void)editPressed {
    EditNoteViewController *editNoteVC = [[EditNoteViewController alloc] init];
    editNoteVC.city = self.city;
    [self.navigationController pushViewController:editNoteVC animated:YES];
}
```
