

# POSTING A NOTIFICATION IN INITWITHJSON

## City.m ( inside initWithJSON )

```
AFJSONRequestOperation *operation = [AFJSONRequestOperation
    JSONRequestOperationWithRequest:request
    success:^(NSURLRequest *request, NSHTTPURLResponse *response, id JSON) {
        self.name      = JSON[@"name"];
        self.state      = JSON[@"state"];
        self.population = JSON[@"population"];
        [[NSNotificationCenter defaultCenter]
            postNotificationName:@"initWithJSONFinishedLoading"
            object:nil];
    }
}
```

*Post a notification in the last line of the success block*

# LISTENING FOR A NOTIFICATION IN A CONTROLLER

## CityViewController.m

```
- (void)viewDidLoad {
    self.city = [[City alloc] initWithJSON];

    [[NSNotificationCenter defaultCenter]
     addObserver:self
     selector:@selector(dataRetrieved)
     name:@"initWithJSONFinishedLoading"
     object:nil];

- (void)dataRetrieved {
    NSLog(@"City state is: %@", self.city.state);           Florida
    NSLog(@"City population is: %@", self.city.population); 238300
}
```
