

Adding annotation properties for the callout bubble

MapViewController.m

```
- (void) viewDidLoad
{
    ...

    CLLocationCoordinate2D annotationCoordinate =
        CLLocationCoordinate2DMake(28.544192, -81.373286);

    MyAnnotation *annotation = [[MyAnnotation alloc] init];
    annotation.coordinate = annotationCoordinate;
    annotation.title = @"Lake Eola";
    annotation.subtitle = @"Cool swans";

    [self.mapView addAnnotation:annotation];
}
```

Enabling the callout bubble

MapViewController.m

```
- (MKAnnotationView *)mapView:(MKMapView *)mapView
    viewForAnnotation:(id<MKAnnotation>)annotation
{
    // view initializing code

    view.image = [UIImage imageNamed:@"altPin.png"];
    view.canShowCallout = YES;

    return view;
}
```
