Objective C static code analysis

Unique rules to find Bugs, Vulnerabilities, Security Hotspots, and Code Smells in your OBJECTIVE C code

More specifically:

should be strictly positive

O RDONLY, O WRONLY, or O RDWR

• flag O EXCL should be used with O CREAT

and should be initialized by PTHREAD_ONCE_INIT **Noncompliant Code Example** int res = open(file, O_CREAT); // Noncompliant, flag O_CREAT void *mem = alloca(0); // Noncompliant, allocation of 0 bytes extern void initialize(); pthread_once_t pthread = PTHREAD_ONCE_INIT; pthread once(&pthread, initialize); // Noncompliant, do not p Available In: sonarcloud 👌 | sonarqube

UNIX/POSIX functions can have undefined behavior if they are not called correctly.

• allocation size of calloc, malloc, realloc, reallocf, alloca and valloc

• open and openat should be called with a flag that contains one access mode:

• open and openat with flag O_CREAT should be called with a third argument

• first argument of pthread once should not have automatic storage duration

```
with arguments that trigger buffer
overflows
■ Vulnerability
Function-like macros should not be
invoked without all of their arguments
📆 Bug
The address of an automatic object
should not be assigned to another
object that may persist after the first
object has ceased to exist
📆 Bug
"pthread_mutex_t" should be unlocked
in the reverse order they were locked
🖷 Bug
"pthread_mutex_t" should be properly
initialized and destroyed
🖷 Bug
"pthread_mutex_t" should not be
consecutively locked or unlocked
twice
📆 Bug
Functions with "noreturn" attribute
should not return
📆 Bug
"memcmp" should only be called with
pointers to trivially copyable types
with no padding
🖷 Bug
Stack allocated memory and non-
owned memory should not be freed
📆 Bug
Closed resources should not be
accessed
📆 Bug
Dynamically allocated memory should
be released
📆 Bug
```

Freed memory should not be used Recursion should not be infinite Bug Recursion should not be infinite Bug Resources should be closed Bug Resources should be closed Code Smell Switch labels should not be nested inside non-switch blocks Code Smell Memory access should be explicitly bounded to prevent buffer overflows Replication should not lead to unexpected behavior at runtime Bug Recursion should not be infinite Security Bug Resources should be closed Code Smell Switch labels should not be nested inside non-switch blocks Code Smell	
Memory locations should not be released more than once	Freed memory should not be used
released more than once ## Bug Memory access should be explicitly bounded to prevent buffer overflows ## Bug Printf-style format strings should not lead to unexpected behavior at runtime ## Bug Recursion should not be infinite ## Bug Resources should be closed ## Bug Hard-coded credentials are security-sensitive ## Security Hotspot "goto" should jump to labels declared later in the same function ## Code Smell Only standard forms of the "defined" directive should be used ## Code Smell Switch labels should not be nested inside non-switch blocks	₩ Bug
Memory access should be explicitly bounded to prevent buffer overflows Bug Printf-style format strings should not lead to unexpected behavior at runtime Bug Recursion should not be infinite Bug Resources should be closed Bug Hard-coded credentials are security-sensitive Security Hotspot "goto" should jump to labels declared later in the same function Code Smell Only standard forms of the "defined" directive should be used Code Smell Switch labels should not be nested inside non-switch blocks	
Printf-style format strings should not lead to unexpected behavior at runtime	∰ Bug
Printf-style format strings should not lead to unexpected behavior at runtime Bug Recursion should not be infinite Bug Resources should be closed Bug Hard-coded credentials are security-sensitive Security Hotspot "goto" should jump to labels declared later in the same function Code Smell Only standard forms of the "defined" directive should be used Code Smell Switch labels should not be nested inside non-switch blocks	
lead to unexpected behavior at runtime Bug Recursion should not be infinite Bug Resources should be closed Bug Hard-coded credentials are security-sensitive Security Hotspot "goto" should jump to labels declared later in the same function Code Smell Only standard forms of the "defined" directive should be used Code Smell Switch labels should not be nested inside non-switch blocks	Rug
Recursion should not be infinite Resources should be closed Bug Hard-coded credentials are security- sensitive Security Hotspot "goto" should jump to labels declared later in the same function Code Smell Only standard forms of the "defined" directive should be used Code Smell Switch labels should not be nested inside non-switch blocks	lead to unexpected behavior at
Resources should be closed Bug Hard-coded credentials are security- sensitive Security Hotspot "goto" should jump to labels declared later in the same function Code Smell Only standard forms of the "defined" directive should be used Code Smell Switch labels should not be nested inside non-switch blocks	Rug
Resources should be closed **Bug Hard-coded credentials are security- sensitive **Security Hotspot "goto" should jump to labels declared later in the same function **Code Smell Only standard forms of the "defined" directive should be used **Code Smell Switch labels should not be nested inside non-switch blocks	Recursion should not be infinite
Hard-coded credentials are security- sensitive Security Hotspot "goto" should jump to labels declared later in the same function Code Smell Only standard forms of the "defined" directive should be used Code Smell Switch labels should not be nested inside non-switch blocks	∰ Bug
Hard-coded credentials are security- sensitive Security Hotspot "goto" should jump to labels declared later in the same function Code Smell Only standard forms of the "defined" directive should be used Code Smell Switch labels should not be nested inside non-switch blocks	Resources should be closed
sensitive Security Hotspot "goto" should jump to labels declared later in the same function Code Smell Only standard forms of the "defined" directive should be used Code Smell Switch labels should not be nested inside non-switch blocks	n Bug
"goto" should jump to labels declared later in the same function Code Smell Only standard forms of the "defined" directive should be used Code Smell Switch labels should not be nested inside non-switch blocks	
Iater in the same function Code Smell Only standard forms of the "defined" directive should be used Code Smell Switch labels should not be nested inside non-switch blocks	Security Hotspot
Only standard forms of the "defined" directive should be used Code Smell Switch labels should not be nested inside non-switch blocks	
directive should be used Code Smell Switch labels should not be nested inside non-switch blocks	Code Smell
Switch labels should not be nested inside non-switch blocks	
inside non-switch blocks	
Code Smell
