## **Objective C static code analysis**

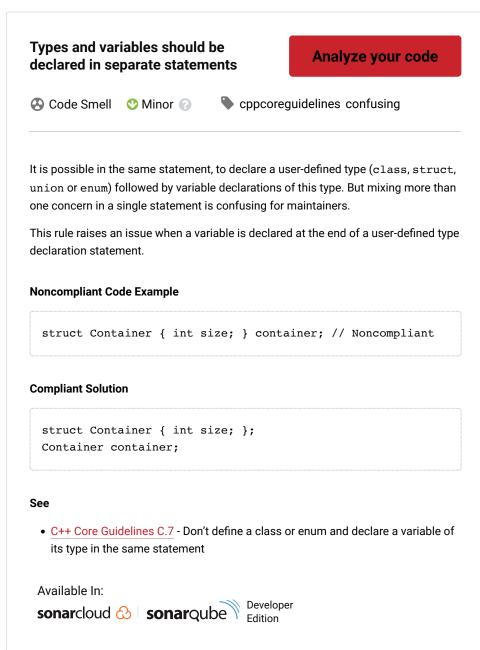

Unique rules to find Bugs, Vulnerabilities, Security Hotspots, and Code Smells in your OBJECTIVE C code

All 315 rules	6 Vulnerability 10	<b>∰</b> Bug <b>75</b>	Security 18 Hotspot	⊕ Code (212) Smell	Quick 13 Fix	
			Tags	✓ Search by	/ name	Q

"memset" should not be used to delete sensitive data Vulnerability POSIX functions should not be called with arguments that trigger buffer overflows ■ Vulnerability Function-like macros should not be invoked without all of their arguments 📆 Bug The address of an automatic object should not be assigned to another object that may persist after the first object has ceased to exist 📆 Bug "pthread\_mutex\_t" should be unlocked in the reverse order they were locked 📆 Bug "pthread\_mutex\_t" should be properly initialized and destroyed 📆 Bug "pthread\_mutex\_t" should not be consecutively locked or unlocked twice 📆 Bug Functions with "noreturn" attribute should not return 📆 Bug "memcmp" should only be called with pointers to trivially copyable types with no padding 📆 Bug Stack allocated memory and nonowned memory should not be freed 📆 Bug Closed resources should not be accessed 📆 Bug Dynamically allocated memory should

be released

📆 Bug

Freed memory should not be used  Recursion should not be infinite  Bug  Recursion should not be infinite  Bug  Resources should be closed  Bug  Resources should be closed  Code Smell  Switch labels should not be nested inside non-switch blocks  Code Smell  Memory access should be explicitly bounded to prevent buffer overflows  Replication should not lead to unexpected behavior at runtime  Bug  Recursion should not be infinite  Security Bug  Resources should be closed  Code Smell  Switch labels should not be nested inside non-switch blocks  Code Smell	
Memory locations should not be released more than once	Freed memory should not be used
released more than once  ## Bug  Memory access should be explicitly bounded to prevent buffer overflows  ## Bug  Printf-style format strings should not lead to unexpected behavior at runtime  ## Bug  Recursion should not be infinite  ## Bug  Resources should be closed  ## Bug  Hard-coded credentials are security-sensitive  ## Security Hotspot  "goto" should jump to labels declared later in the same function  ## Code Smell  Only standard forms of the "defined" directive should be used  ## Code Smell  Switch labels should not be nested inside non-switch blocks	<b>₩</b> Bug
Memory access should be explicitly bounded to prevent buffer overflows  Bug  Printf-style format strings should not lead to unexpected behavior at runtime  Bug  Recursion should not be infinite  Bug  Resources should be closed  Bug  Hard-coded credentials are security-sensitive  Security Hotspot  "goto" should jump to labels declared later in the same function  Code Smell  Only standard forms of the "defined" directive should be used  Code Smell  Switch labels should not be nested inside non-switch blocks	
Printf-style format strings should not lead to unexpected behavior at runtime	<b>∰</b> Bug
Printf-style format strings should not lead to unexpected behavior at runtime  Bug  Recursion should not be infinite  Bug  Resources should be closed  Bug  Hard-coded credentials are security-sensitive  Security Hotspot  "goto" should jump to labels declared later in the same function  Code Smell  Only standard forms of the "defined" directive should be used  Code Smell  Switch labels should not be nested inside non-switch blocks	
lead to unexpected behavior at runtime  Bug  Recursion should not be infinite  Bug  Resources should be closed  Bug  Hard-coded credentials are security-sensitive  Security Hotspot  "goto" should jump to labels declared later in the same function  Code Smell  Only standard forms of the "defined" directive should be used  Code Smell  Switch labels should not be nested inside non-switch blocks	Rug
Recursion should not be infinite  Resources should be closed  Bug  Hard-coded credentials are security- sensitive  Security Hotspot  "goto" should jump to labels declared later in the same function  Code Smell  Only standard forms of the "defined" directive should be used  Code Smell  Switch labels should not be nested inside non-switch blocks	lead to unexpected behavior at
Resources should be closed  Bug  Hard-coded credentials are security- sensitive  Security Hotspot  "goto" should jump to labels declared later in the same function  Code Smell  Only standard forms of the "defined" directive should be used  Code Smell  Switch labels should not be nested inside non-switch blocks	Rug
Resources should be closed  **Bug  Hard-coded credentials are security- sensitive  **Security Hotspot  "goto" should jump to labels declared later in the same function  **Code Smell  Only standard forms of the "defined" directive should be used  **Code Smell  Switch labels should not be nested inside non-switch blocks	Recursion should not be infinite
Hard-coded credentials are security- sensitive  Security Hotspot  "goto" should jump to labels declared later in the same function  Code Smell  Only standard forms of the "defined" directive should be used  Code Smell  Switch labels should not be nested inside non-switch blocks	<b>∰</b> Bug
Hard-coded credentials are security- sensitive  Security Hotspot  "goto" should jump to labels declared later in the same function  Code Smell  Only standard forms of the "defined" directive should be used  Code Smell  Switch labels should not be nested inside non-switch blocks	Resources should be closed
sensitive  Security Hotspot  "goto" should jump to labels declared later in the same function  Code Smell  Only standard forms of the "defined" directive should be used  Code Smell  Switch labels should not be nested inside non-switch blocks	<b>n</b> Bug
"goto" should jump to labels declared later in the same function  Code Smell  Only standard forms of the "defined" directive should be used  Code Smell  Switch labels should not be nested inside non-switch blocks	
Iater in the same function Code Smell Only standard forms of the "defined" directive should be used Code Smell Switch labels should not be nested inside non-switch blocks	Security Hotspot
Only standard forms of the "defined" directive should be used  Code Smell  Switch labels should not be nested inside non-switch blocks	
directive should be used Code Smell  Switch labels should not be nested inside non-switch blocks	
Switch labels should not be nested inside non-switch blocks	
inside non-switch blocks
