All rules (119)

## **Swift static code analysis**

6 Vulnerability (3)

Unique rules to find Bugs, Vulnerabilities, Security Hotspots, and Code Smells in your SWIFT code

**R** Bug (14)

Hard-coded credentials are securitysensitive Security Hotspot Methods and field names should not be the same or differ only by capitalization Code Smell Cipher algorithms should be robust Vulnerability Using weak hashing algorithms is security-sensitive Security Hotspot **Cognitive Complexity of functions** should not be too high Code Smell "try!" should not be used Code Smell String literals should not be duplicated Code Smell Functions and closures should not be empty Code Smell

Collection elements should not be

Collection sizes comparisons should

should not have exactly the same

update their left operands

Precedence and associativity of standard operators should not be

replaced unconditionally

Tags Search by name... Local variables should not Analyze your code have the same name as fields or "enum" cases suspicious pitfall Shadowing fields or enum cases with a local variable is a bad practice that reduces code readability: It makes it confusing to know whether the field or the variable is being used. **Noncompliant Code Example** public class Foo { public var myField:Int = 0 public func doSomething() { var myField = 0} } Available In: Developer sonarlint ⊕ | sonarcloud ↔ | sonarqube |

All branches in a conditional structure Infix operators that end with "=" should

<b>∰</b> Bug
Return values from functions without side effects should not be ignored
<b>∰</b> Bug
Related "if/else if" statements and "cases" in a "switch" should not have the same condition
Rug
Identical expressions should not be used on both sides of a binary operator
🖟 Bug
All code should be reachable
Rug
Loops with at most one iteration should be refactored
🖟 Bug
"IBInspectable" should be used correctly
Functions should not have identical implementations
Ternary operators should not be nested
Closure expressions should not be nested too deeply
Code Smell
Backticks should not be used around
