Using AFNetworking to get JSON data

MapViewController.h

```objectivec
@property (strong, nonatomic) NSArray *mapLocations;
```

MapViewController.m

```objectivec
NSURL *url = [[NSURL alloc] initWithString:@"http://example.com/api/getPlaceInfo"];
NSURLRequest *request = [[NSURLRequest alloc] initWithURL:url];
AFJSONRequestOperation *operation = [AFJSONRequestOperation
    JSONRequestOperationWithRequest:request
    success:^(NSURLRequest *request, NSHTTPURLResponse *response, id JSON) {

    } failure:^(NSURLRequest *request, NSHTTPURLResponse *response,
                                        NSError *error, id JSON) {
        NSLog(@"NSError: %@",error.localizedDescription);
    }];
[operation start];
```
