# ADDING A NOTES @PROPERTY TO THE CITY MODEL

**City.h**

```objc
#import <Foundation/Foundation.h>

@interface City : NSObject

@property (strong, nonatomic) NSString *name;
@property (strong, nonatomic) NSString *state;
@property (strong, nonatomic) NSNumber *population;
@property (strong, nonatomic) NSString *notes;

- (id)initWithJSON;

@end
```

Editing Data In Models

iOS
OPERATION:
MODELS

## City.m

```objc
@implementation City

- (id)init {
    self = [self initWithJSON];
}

- (id)initWithJSON {
    self = [self init];
    if(self) {

        ...
        self.notes = @"no notes yet";
        ...

    }
    return self;
}

@end
```

because the JSON file doesn't have any notes data
